

COVERGLASS TAUTEN

Exclusive and sophisticated forced traction mechanism with gas pistons situated inside the round hem bar, which are able to contrast the force of the wind using controlled energy. It ensures an exceptional fabric tension and a greater stability.

Designed to be integrated into outdoor systems.

Suitable for slanted, horizontal, vertical or oblique applications. It combines with motorized blinds.

HEM BAR: round Ø55 mm - Ø75 mm

SIZES:

VERTICAL APPLICATION

H/L (cm)	120 - 210	211 - 350	351 - 600
230	Ø55 mm	Ø55 - Ø75 mm	Ø75 mm
350	Ø75 mm	Ø55 - Ø75 mm	Ø75 mm
700	--	Ø75 mm	Ø75 mm

HORIZONTAL APPLICATION

H/L (cm)	120 - 210	211 - 310
350	Ø75 mm	Ø75 mm
700	--	Ø75 mm

*The dimensions are a rough guide. They depend on the system, the fabric weight or applications. Contact us for more information.
